JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

The Necrology.

FOREST W. BRAYTON, M. D.

F. W. ENTREKIN, M. D., Findlay, Ohio.

Forest W. Brayton, M. D., whose demise the members of the American Society of Microscopists deplore, was born in McCutchensville, Wyandot county, Ohio, September 10, 1856, and died December 4, 1890. He studied medicine four years in Cincinnati, Ohio, attending four courses of lectures in Miami Medical College. He graduated in the spring of 1880; was married October 20, 1881. His wife died June 19, 1885. He practiced medicine in Carey, Ohio, until June 7, 1890, when he moved to Toledo, Ohio, and associated in partnership with Dr. W. W. Jones, of that city. He was secretary of the Northwestern Ohio Medical Society, a member of the Toledo Academy of Medicine, the Ohio State Medical Society, the American Medical Association; and last, but not least, of the American Society of Microscopists. For some time before his death he was making rapid progress in the science of microscopy, and owned a fine Bulloch instrument with a good outfit of Zentmayer's objectives and a fine collection of mounted objects. He leaves a promising little boy of seven, a father and mother, with a host of friends, to mourn his early departure. Over-study, operating upon a nervous and excitable temperament, no doubt contributed to the result.
